youtube/@be-programmer

As an experienced software developer, I design web applications using the MERN stack. With a focus on intuitive user experiences, I create visually appealing and scalable websites by leveraging MongoDB, Express.js, React.js, and Node.js. My expertise in this technology stack allows me to deliver cutting-edge web solutions that make a lasting impact.

## Education

### Bachelor of computer science and artificial intelligence

Expected to graduate in 2024  
GPA of 3.30 / 4.00

## Projects

### E-Commerce Website

Developed a fully functional e-commerce platform that allows users to browse products, add items to the cart, and complete orders securely.

### Portfolio Website

Designed and developed a responsive portfolio website to showcase my skills and projects

### Coffee-Nearby

Developed "Coffee-Nearby," a web application that allows users to find coffee stores in their vicinity.

## Personal Skill

- Critical Thinking
- Problem Solving
